

CEREC®

HISTORY OF CEREC

The CEREC procedure was developed at Zurich University and has been successfully used in dental practices since 1985 - for more than 30 years.

Worldwide more than 45,000 practices in more than 50 countries utilize the CEREC system.

Millions of patients have been treated using CEREC. More than 20 million ceramic restorations have been created and placed.

Long-term clinical studies demonstrate - in terms of durability - CEREC restorations are at least equivalent to gold restorations.

Depending on the individual case, CEREC restorations can achieve even better results than gold ones.

CEREC®

BENEFITS AT A GLANCE

- ✓ Single Visit
- ✓ No Impressions
- ✓ No Temporaries
- ✓ Metal-Free
- ✓ Highly Aesthetic
- ✓ Long Lasting

MODERN CAD/CAM TECHNOLOGY
MAKES IT POSSIBLE.

SINGLE-VISIT RESTORATIONS WITH CEREC®.

CEREC is a sophisticated CAD/CAM system for the production of all-ceramic inlays, onlays, partial crowns, veneers and crowns for anterior and posterior teeth.

THE CEREC PROCESS

5 SIMPLE STEPS TO YOUR NEW TOOTH

STEP 1

Before treatment begins we inform you about the benefits of CEREC.

STEP 2

After removing the decayed tissue or the defective filling we create the 3D image of the tooth with the CEREC camera.

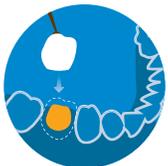

STEP 3

The restoration is designed in office on the CEREC while you wait.

STEP 4

The CEREC milling unit makes the restoration out of a ceramic block.

STEP 5

The milled restoration is bonded directly to your tooth.

THE ADVANTAGES OF CEREC®

CEREC RESTORATIONS CAN BE CREATED AND PLACED DURING A SINGLE APPOINTMENT.

NO IMPRESSIONS

The CEREC 3D measuring camera scans the prepared tooth in just a few seconds. This eliminates the need for unpleasant impressions.

NO TEMPORARIES

CEREC restorations are milled from a solid ceramic or zirconia block in just minutes in the office and can be ready to place immediately. This eliminates the need for temporary fillings and crowns, meaning you don't have to wait for days until the restoration is finished by a lab; you can have your permanent crown placed in a single office visit.

NO LONG WAIT PERIODS

Because CEREC restorations can be placed immediately, you need only one appointment. And you benefit from tooth restorations that have demonstrated their durability time and time again.
